Dear Students,

We hope this email finds you in great health and high spirits. We are excited to announce the Data Visualization Challenge 2024, organized by IEEE RGPT SB, where you'll have the opportunity to showcase your data analysis and visualization skills!

Registration: [Click here to register](#)

In this challenge, you'll be provided with datasets, and your task will be to perform exploratory data analysis, extract insights, and make predictions based on your findings. Based on the dataset provided, you are expected to define your own problem statement and pitch your own solution. You will then need to prepare a 5-minute presentation video summarizing your results and submit the video link via the submission form.

Here's what you can expect from the event:

Team Collaboration: Form a team of 2-4 individuals to analyze the provided datasets, define your problem statement, collaborate on insights, and present your solution and predictions.

Networking: Connect with fellow participants passionate about data and analytics, and build meaningful relationships within the data science community.

Important Dates:

Registration Deadline: 21st December, 2024 till midnight.
Submission Deadline: 4th January, 2025 till midnight.

Please note that the **final submission** should include a 5-minute video of your presentation, and the link to your video must be submitted through the provided form.

We look forward to seeing how you can use data to define a meaningful problem and present an innovative solution. This is an excellent opportunity to hone your analytical and presentation skills, and we can't wait to see your creative insights and solutions!

Let's come together, analyze, innovate, and present!

Thanks & Regards
